Lock – products with the modern installation system using the glueless MagLock joint.

Ecology

MAGNUM places a priority on complying with the highest environmental standards in our industry. We also apply these same standards to our suppliers. MAGNUM products are made exclusively with formaldehyde-free PVAC, 100% ecological lacquers and natural oils (for surface treatment), and the entire production process is controlled and organised in a way which eliminates any negative impact on our environment.

WARNING: The photographs in this brochure are exclusively for illustrative purposes. Wood is a natural material and the photographs shown may not correspond exactly with the product supplied.
